DETAILED ACTION

1. This action is responsive to papers filed on September 23, 2005.

Response to Amendment

2. In response to applicant's amendment received on September 23, 2005, all requested changes to the claims have been entered. Claims 11, 15 and 20-24 have been cancelled.

Allowable Subject Matter

3. Claims 1-5, 7-10, 12-14 and 16-19 are allowed.
4. The following is an examiner's statement of reasons for allowance:

As to claims 1 and 18, none of the prior art teach or fairly suggests the limitation of "a processing circuit for determining a time delay between said sensor signals from said finger detectors, wherein said time delay between said sensor signals is a representative of a speed of the finger", in combination with the other limitations of the claims. The prior art of Gerpheide discloses a finger sensing apparatus, including finger detectors which detect movement and position of a finger, but they do not teach or fairly suggest determining a time delay between said sensor signals from said finger detectors, wherein said time delay between said sensor signals is a representative of a speed of the finger.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
